**COURSES**

**July 9, 2007 – August 17, 2007**

**BUSN-115 Introduction to Business and Technology**

This course introduces business and the environment in which business operate. Students examine the roles of major functional areas of business and interrelationships among them. Organizational theories and techniques are examined, and economics, cultural and technological factors affecting business organizations are evaluated.

Earn 3 Credit Hours

**COMP-129 PC Hardware and Software with Lab**

This course explores PC systems from software, hardware and operating system points of view. Hardware topics include system boards, processors, memory, power supplies, input/output (I/O) ports, internal adapters, printers and basic networking devices. Software topics include client/server operating systems and installation, as well as licensing software applications.

Earn 3 Credit Hours

**MATH-114 College Algebra**

This course focuses on topics such as basic treatment of algebraic expressions, solving linear equations and inequalities, graphing linear equations and inequalities, polynomial operations, positive and negative integral exponents, factoring, systems of linear equations, radical and rational expressions, quadratic equations and various applications problems. Eligibility to enroll in the course is based on placement results, or successful completion of MATH-092 or MATH-102.

Earn 4 Credit Hours

**SPCH-275 Public Speaking**

This course teaches basic elements of effective public speaking. Topics include audience analysis, organization, language, delivery and nonverbal communication. Practical application is provided through a series of individual and group presentations in a variety of rhetorical modes. Prerequisite: ENGL-112

Earn 3 Credit Hours

**NETW 202 – Introduction to Networking with Lab**

This course introduces the underlying technology of local area networks (LANs), wide area networks (WANS) and the Internet. Topics include networking media, the Open System Interconnection (OSI) model, transmission control protocol/Internet protocol (TCP/IP), an overview of routing and switching, and small network configuration and troubleshooting. Students prepare and test cabling and become familiar with protocol analyzers.

Earn 3 Credit Hours

**NETW 204 – Introduction to Routing with Lab**

This course introduces router configuration, maintenance and troubleshooting; routing protocols; and use of access control lists (ACLs) as a traffic management tool. Students gain command-line interface (CLI) knowledge and configure local and wide area networks with routers. In addition, students apply the transmission control protocol/Internet protocol (TCP/IP) suite of commands and ACLs to real networks under troubleshooting and traffic management scenarios. Prerequisite: NETW-202

Earn 3 Credit Hours

“The Passport2College program at DeVry was the best thing I could have taken part in during the summer. It made me realize the dedication and hard work you have to put in when attending college and really gave me that college experience I was looking for before graduating from high school. Passport2College allowed me to take a leadership role and understand my strengths and weaknesses in and outside of the classroom.

The best part was the college credit you earn when you complete the course. I was able to show everyone my accomplishments.”

Emily S. Wilson
